## SUMMARY

Hi, I am a Front-end Developer from Ukraine. I am motivated, responsible, organized developer.  
It is very important for me to write high quality, fast and efficient code.  
I pay special attention to the architecture of the application to make it logical, consistent and understandable.  
This allows the application to be more flexible and extensible, which is very important.  
I am always interested in personal growth as an individual and programmer, as well as company growth!

---

## EXPERIENCE

### Frontend Developer Freelance

May 2023 - Present

- Website development based on designs in Figma.
- Use of different preprocessors (css) and styling approaches in the project.
- Active use of HTML5 semantics.
- Solving old bugs, as well as writing clean, structured code.
- Writing projects based on React.js framework.
- Developing responsive and adaptive designs.

---
