SUMMARY

Hi, I am a Full Stack Developer from Ukraine. I am motivated, responsible, organized developer.
It is very important for me to write high quality, fast and efficient code.
I pay special attention to the architecture of the application to make it logical, consistent and understandable.
This allows the application to be more flexible and extensible, which is very important.
I am always interested in personal growth as an individual and programmer, as well as company growth!

EXPERIENCE

Full Stack Developer

CGS-team   **May 2024 -June 2024, Remote**

· **Frontend Development:** Built a responsive and intuitive user interface using **React** and **Next.js**, leveraging its server-side rendering capabilities to improve performance and SEO.
· **Backend Services:** Created and integrated backend services using **Node.js** and **Nest.js**, managing essential data for clients, photographers, bookings, and payments. Implemented features for managing user profiles, permissions, and auth using **JWT**.
· **Database Management and Storage:** Structured and maintained a **PostgreSQL** database using **Prisma ORM** to handle the storage and retrieval of large volumes of data efficiently. Also integrated **AWS S3** for scalable and secure storage of high-resolution images uploaded by photographers and clients.
· **Payment Processing:** Integrated secure payment solutions with **Stripe**.
· **Team Collaboration:** Collaborated with other team members using **Notion** and **Figma**.

Full Stack Developer

Freelance   **May 2023 - May 2024, Remote**

· Developing responsive and adaptive sites based on **Figma** designs.
· Active use of **HTML5** semantics, different preprocessors (**SASS**) and **CSS** styling approaches in the project.
· Solving old bugs, as well as writing clean, structured **JavaScript** code.
· Writing projects based on **React/Next** and **Node/Express**.

PROJECTS

Portfolio

golds-portfolio.vercel.app/ · March 2024 -April 2024
· Developed a portfolio website to show my skills and knowledge.
